

48CARAT **KRISHI COIN**

WHITEPAPER v1.0

Agriculture • Blockchain • Community • Social Impact

INFORMATIONAL DOCUMENT • CRYPTO ASSET RISK APPLIES

INTRODUCTION

A community vision rooted in Indian agriculture

KRISHI Coin (48CARAT) is a community-driven social-impact token concept connecting blockchain participation with a long-term vision around agriculture, community service and transparent digital infrastructure.

The effort to bring the KRISHI community together, and the vision of developing and deploying KRISHI Coin, began on May 17, 2022. The date marks the beginning of this community and project vision; it is not presented here as the token deployment date.

Purpose

Build an open community identity around agriculture, social helpers, blockchain participation and responsible long-term development.

Approach

Present token information, roadmap, community direction and risk disclosures clearly so visitors can make their own independent assessment.

ABSTRACT

Blockchain, community and social impact

KRISHI Coin is designed as a community-focused blockchain project with an agriculture and social-impact identity.

Community

The vision brings together people connected with agriculture, social service and decentralized participation.

Transparency

Contract information and public blockchain data can be independently reviewed through the BNB Smart Chain explorer.

Long-term direction

The roadmap explores community growth, real-world utility and social-organization partnerships.

Risk awareness

No return, income, price appreciation or future value is guaranteed. Crypto assets involve significant risk.

MISSION

A practical, community-first direction

The mission is to develop a clear and accessible decentralized community platform centered on agriculture, social participation and blockchain technology.

Mission

Support a community where farmers, helpers, contributors and blockchain participants can connect around shared social and agricultural themes, while keeping public information understandable and transparent.

Vision

Build a growing community identity that connects Indian agriculture, social service and decentralized technology, with future utilities developed progressively and communicated clearly.

ECOSYSTEM

Participation and future utility

The original project concept discusses staking and ecosystem development. Any feature is subject to actual implementation, applicable protocol rules and market conditions.

Staking concept

Staking has been described as an ecosystem direction. Rewards, if any, are not guaranteed and should be assessed against the actual deployed contracts and rules.

Fast transfers

KRISHI is designed as a BEP-20 token on BNB Smart Chain, supporting standard token transfers subject to network conditions.

Organic ecosystem

The roadmap explores organic-product marketplace concepts and other agriculture-linked utility ideas.

Social participation

Future community initiatives may include NGO and social-organization collaborations as development progresses.

TOKEN DETAILS

48CARAT KRISHI COIN

Core token information for public reference.

SYMBOL KRISHI	TOTAL SUPPLY 480,000,000 KRISHI
DECIMALS 18	STANDARD BEP-20
NETWORK BNB Smart Chain	CONTRACT 0xfA3885e9BebB9F9D2e89565D7F35A5f3Ce8CC67B

Ownership is presented as renounced. Independent on-chain verification is recommended.

TOKENOMICS

Published phase reference model

The following figures reflect the project's published phase model. Reference values are informational and are not guarantees of market prices or returns.

PHASE	ALLOCATION	REFERENCE VALUE
1	70,000,000	\$0.012
2	70,000,000	\$0.025
3	70,000,000	\$0.048
4	70,000,000	\$0.096
5	70,000,000	\$0.192
6	70,000,000	\$0.384
7	60,000,000	\$0.768 – \$1

The historical/reference model should not be interpreted as a promise of future value.

ROADMAP

A staged path for community and utility development

The roadmap describes intended areas of development. Delivery, timing and availability depend on implementation and applicable requirements.

01

Foundation

Build the core team and define project goals.

02

Identity

Develop official website, branding and social channels.

03

Community

Organize onboarding and community participation.

04

Listings

Explore DEX/CEX listings where appropriate and subject to requirements.

05

Use Cases

Explore organic-store, staking-app and NGO integrations as development progresses.

06

Partnerships

Develop relationships with social organizations and community initiatives.

SECURITY

Verify the chain, not just the story

Renounced ownership can reduce certain administrative controls, but it does not by itself guarantee contract safety, liquidity, profitability or absence of vulnerabilities.

Current Contract

0xfA3885e9BebB9F9D2e89565D7F35A5f3Ce8CC67B BscScan:
bscscan.com/address/0xfA3885e9BebB9F9D2e89565D7F35A5f3Ce8CC67B

Independent review

Before interacting, verify the contract address, source-code status, holders, liquidity, transactions and other on-chain details directly on the explorer.

Liquidity & audits

Liquidity status and audit status should be checked independently from current on-chain evidence. No security outcome is guaranteed by this document.

FEATURES

Built around simple, visible principles

The project identity combines token infrastructure with community and social-impact themes.

BEP-20

Standard token format on BNB Smart Chain.

Community Governance

Community participation is part of the project vision; actual governance mechanisms depend on implementation.

Public Blockchain Data

On-chain activity can be reviewed through public explorers.

Social Impact

The community vision includes agriculture and people who serve their communities.

Future Utility

Roadmap concepts may evolve as actual products and integrations are developed.

Risk Disclosure

Participants should independently evaluate technical, market, regulatory and liquidity risks.

COMMUNITY & PURPOSE

People who help communities grow

KRISHI's social-purpose vision recognizes people whose work supports agriculture, welfare, health, animals and the environment.

Organic Farmers

People connected to agriculture and food systems.

NGO Volunteers

Community members contributing through social organizations.

Emergency & Health Workers

People supporting health and emergency response.

Child & Women Welfare Helpers

People contributing to welfare and protection initiatives.

Animal Caretakers

People supporting animal care and welfare.

Environmental Activists

People working toward environmental awareness and protection.

TRANSPARENCY

Public information should remain independently

Transparency is a core project principle. Visitors should rely on current on-chain evidence and official public information rather than assumptions.

Explorer data

Contract activity, transfers and other blockchain records can be checked through BscScan.

Contract identity

The current contract address is published clearly so visitors can compare it before interacting.

Community channels

Officially published community channels provide a route for updates and participation.

Independent assessment

Users should perform their own technical, market and regulatory assessment before participating.

LEGAL DISCLAIMER

Important information before participation

This whitepaper is provided for informational purposes. It describes the project vision, token information, roadmap and community direction.

48CARAT KRISHI Coin does not guarantee returns, income, price appreciation or future value. Cryptocurrency assets can be volatile and may involve substantial technical, market, liquidity, regulatory and cybersecurity risks. Participation is voluntary and at the user's own risk.

Nothing in this document constitutes legal, financial or investment advice. Readers should conduct their own research and, where appropriate, seek independent professional advice. Project information, plans and features may change as development progresses.

CRYPTO ASSET RISK WARNING

Do not rely on historical phase values as promises of future market value. Verify current on-chain information before interacting with any contract or token.
